

## **Wanted: Volunteers for science-educational project**

International educational project “Lecturers without borders” is looking for volunteers.

Contact us to build a perfect match if you:

- Believe in power of education,
- Are passionate about science,
- Want to accomplish a good deed before Christmas,
- Are willing to contribute to spreading knowledge and creating equal opportunities for students from developing countries.

Details in brief:

- Duration: 1-3 months
- Estimated time spent for the project: starting from 5 hours weekly
- Responsibilities: expanding the database of schools around the world to partner with the project
- Tools: online research and emails exchange
- Financial and other details: non-payable, the certificate of recognition on behalf of the international educational organization will be provided to the participants

About the project:

Lecturers without borders is a project launched by a group of international scientists. The headquarters of the project are in Paris and Munich. The creators of the project are scientists and university and school professors who use their travel opportunities (when attending scientific conferences, going on holidays, etc.) to give free outreach-lectures in local schools and universities. The main target is to inspire the high school students and to raise their motivation in learning science. As of today the project has already 100 lecturers and about 500 schools in Europe and Asia. Till the end of 2020 we are planning to cover major and most visited cities of the world to organise dozens of lecturers monthly. Well known professors and science, such as Pr. Cristina Masoller, Pr. Ariel Lindner, Pr. Andrey Rajgorodsky have already joined our advisory board. Meet both our advisory board and core team here <https://scied.network/who-we-are/>.
