

Dear Colleagues,

we are **Lecturers without borders**, scientists and university and school professors use their travel opportunities (when we attend scientific conferences, when we go on holidays, etc.) to give free outreach-lectures in local schools and universities.

Here is an opportunity to partner with us if you are currently working in schools around country:

- Please find below the **presentation** about "Lecturers without borders" (PDF): https://github.com/lecturers-without-borders/docs_images_maps/blob/master/presentations/Lecturers_withou_borders_general_july2019.pdf
- For simpler explanation about the project, we also made a new video about "Lecturers without borders", which can be found here <https://scied.network/2019/08/07/new-video-about-lecturers-without-borders-2019/>
- **Scheme of the project is simple:**
if there is a scientist who comes to some city and is ready to make interesting seminars of lectures, we connect him/her with the local school.
We already made successful lectures in 9 countries around the world with scientists from 12 countries.

For any questions and suggestions, please do not hesitate to contact us.

On behalf of "Lecturers without borders".
