

# BREAKING THE WALL BETWEEN SCIENCE AND SCHOOL EDUCATION

Lecturers without borders

FALLING WALLS ENGAGE BERLIN 2019

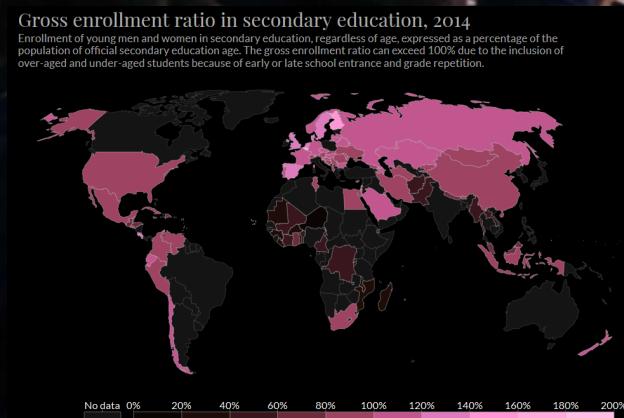

Founding Partner

# BREAKING THE WALL BETWEEN SCIENCE AND SCHOOL EDUCATION

Globally, 25.8 million teachers are needed for higher education.

Lack of basic resources, qualified teachers challenges students of all backgrounds to receive high quality education.

# BREAKING THE WALL BETWEEN SCIENCE AND SCHOOL EDUCATION

## LECTURERS WITHOUT BORDERS

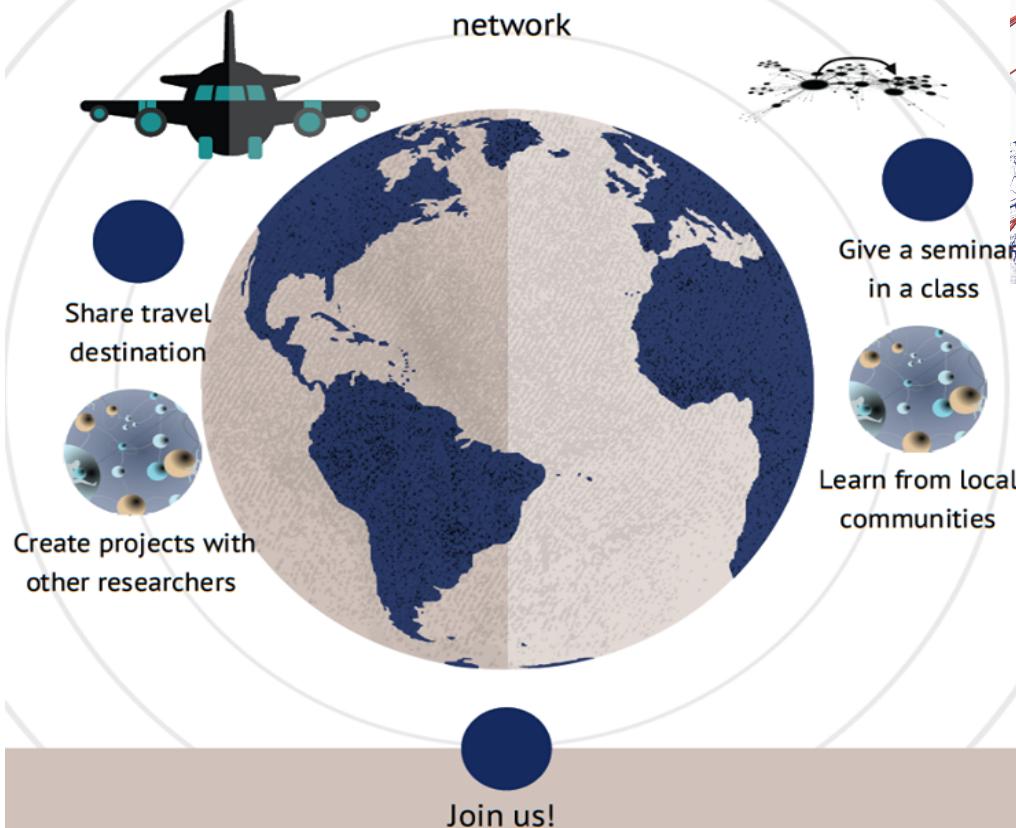

Who we are?

Scientists, educators  
traveling around the  
globe

12

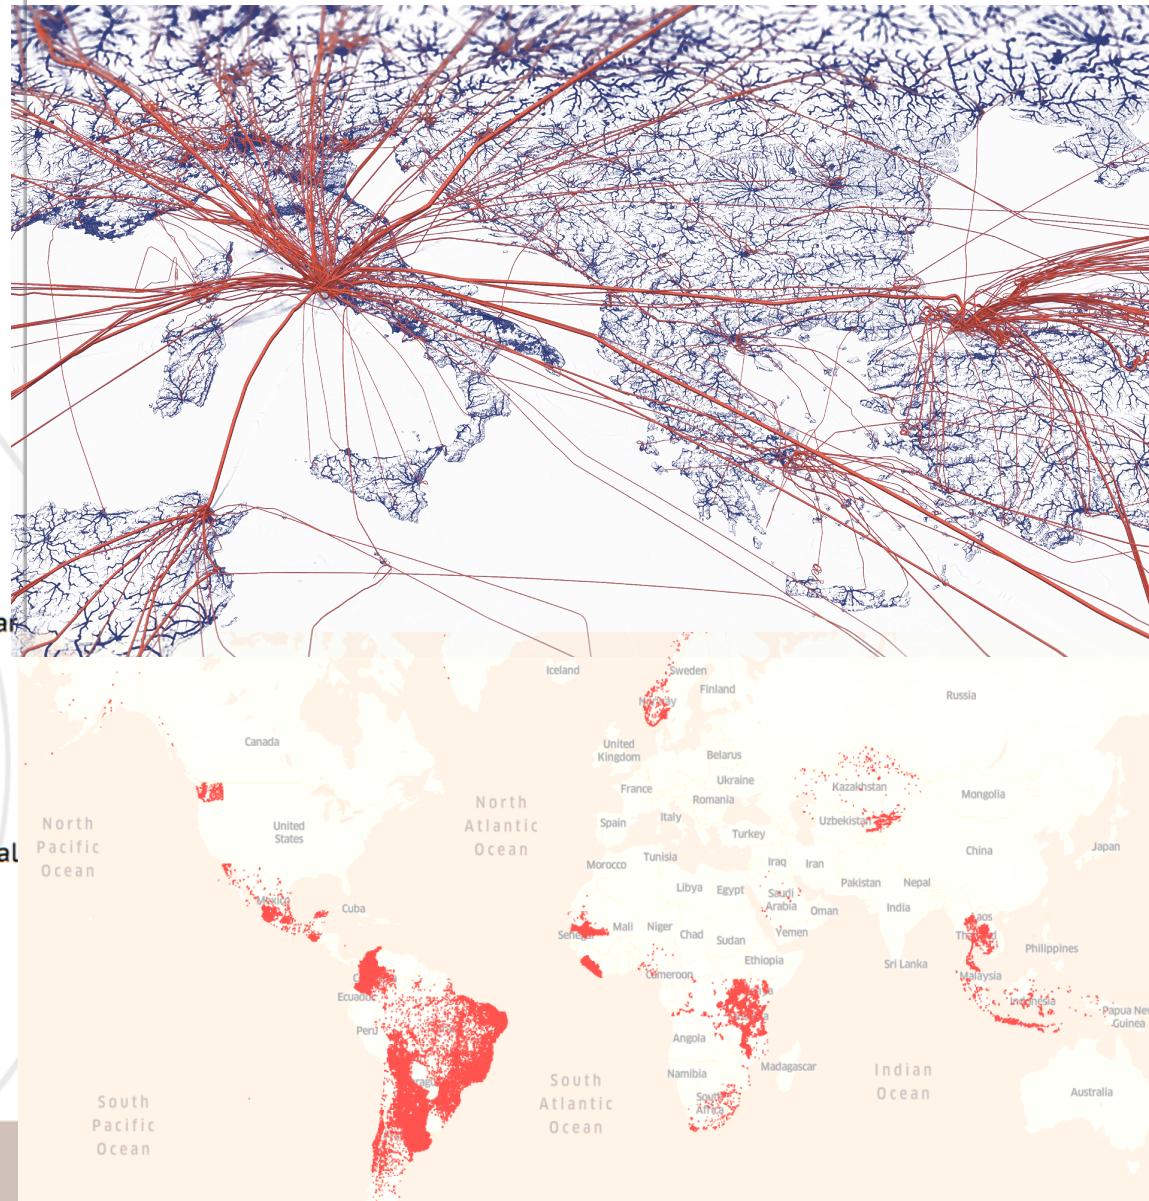

countries in our  
network

OUR GOAL

Link schools and  
traveling scientists

[www.scied.network](http://www.scied.network)

# BREAKING THE WALL BETWEEN SCIENCE AND SCHOOL EDUCATION

## Impact of Lecturers without borders

Science outreach lectures and seminars in 12 countries.

Scientists and educators in our network from  
in Asia, Europe, Africa.

Partnership with local associations, scientific projects,  
universities and international university networks:

# BREAKING THE WALL BETWEEN SCIENCE AND SCHOOL EDUCATION

A black and white photograph of a mountainous landscape. In the foreground, there's a rocky path leading towards a small, isolated house built into a hillside. The background features misty, layered mountains under a bright sky.

**Journey of Lecturers without borders  
started with a small school in Nepal.**

**Exchanging ideas, giving lectures  
we connect to people around the globe,  
whom we may never meet but we are already friends.**

**Diverse and international science communication can  
help to build bridges between different countries.**

# **QUESTIONS?**
